SUMMARY

Results-driven Navy veteran with 8+ years of experience leading complex operations and logistics in high-stakes environments. Currently pursuing a double major in Computer Science and Data Science, with a focus on building data-driven systems and scalable solutions. Combines operational leadership with technical development experience to solve real-world problems through automation, analytics, and software engineering. Proven track record of executing mission-critical objectives, optimizing processes, and adapting quickly in dynamic environments.

EDUCATION

Chaminade University of Honolulu - Bachelor of Science in Computer Science, GPA: 3.9	May 2026
Chaminade University of Honolulu - Bachelor of Science in Data Science, GPA: 3.9	May 2026
Central Texas College - Associate of Arts in General Studies	November 2018

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, TypeScript, R, SQL, HTML/CSS

Frameworks & Libraries: Flask, ASP.NET, Pandas, NumPy, Matplotlib, OpenCV, EasyOCR, scikit-learn, Ultralytics YOLO

Tools & Technologies: Git, GitHub, VS Code, Jupyter, Virtual Environments (venv/conda), ONNX Runtime

Core Competencies: Data Analysis, Data Visualization, Machine Learning, Computer Vision, Data Wrangle, REST APIs

EXPERIENCE

Air Force Office of Scientific Research (AFOSR)	Honolulu, HI
<u>Senior Data Science Research Intern</u>	September 2025 – December 2025

- Conducting AI and data science research on the toxicological impacts of nanomaterials and particulates using machine learning and advanced analytics.
- Supporting the development of data pipelines, visualizations, and technical summaries for AFOSR-funded environmental health research.

Naval Information Warfare Center - Pacific	Pearl City, HI
<u>Software Developer Intern</u>	June 2025 – August 2025

- Developing an AI-powered security system using machine learning methods such as object detection, segmentation, and classification.
- Leveraging You Only Look Once Convolutional Neural Network on low power edge devices for efficient and memory optimized deployment.

National Science Foundation	
<u>Data Science Research and Analytics Student</u>	May 2024 – July 2024

- Analyzed Sentinel-2 satellite imagery to map marine plastic debris off O'ahu's coast during an internship with the Alliance Supporting Pacific Impact through Computational Excellence (NSF ALL-SPICE).
- Trained a decision tree model on the Texas Advanced Computing Center (TACC) supercomputer; visualized results using geemap to support NASA's Interagency Implementation and Advanced Concepts Team (IMPACT).

U.S. Army Pacific Headquarters	Fort Shafter, HI
<u>Data Analyst Intern</u>	August 2023 – December 2023

- Practical experience of Python to generate data visualizations of large language model outputs.
- Analyzing data of sentimental analysis, emotion detection, and translation of social media posts.
- Utilized data science tools and techniques to familiarize with data cleaning, processing, and wrangling.

Defense Logistics Agency Distribution Pearl Harbor	Pearl Harbor, HI
<u>Program Manager</u>	June 2020 – November 2021

- Led, guided, and coached a team of five operations personnel, coordinated the disposal of over 375 expired hazardous materials, and remedied the inventory control.
- Developed spreadsheets to optimize the organization and observation of materials and documentation; increased tracking capabilities and streamline material movement, saving 1.3 manhours per employee.

Naval Supply Fleet Logistics Center

Joint Base Pearl Harbor Hickam, HI

Project Manager

June 2018 – July 2019

- Led a technical warehouse, overseeing the receipt, processing, and transshipment of 4.1K Depot Level Repairables valued at \$173M with exceptional customer service and quality assurance.
- Managed a \$30M budget, achieving a 2-day turnover rate with zero discrepancies, and implemented innovative procedures to streamline aviation turn-in processes.
- Supervised 19 personnel in processing 10,915 registered mails to 131 commands; trained 682 staff in logistics operations and leadership.
- Automated logistics program, saving 4 hours/week; managed 4.1M items for 75 divisions and 25K personnel, delivering 280 hours of support to coalition partners.

USS America (LHA - 6)

San Diego, CA

Program Manager

April 2013 – June 2016

- Managed validation, inventory, and shipment of 1.5K surface and 12.8K aviation supplies; tracked 3.7K parts worth \$97M and 467 assets worth \$8.5M with 100% accuracy.
- Led operations, training, and logistics for 50 personnel; issued 4.4K equipment items to 1.1K personnel across 63 work centers, ensuring flight deck safety compliance.

USS Enterprise (CVN - 65)

Norfolk, VA

Team Lead

August 2011 – April 2013

- Mobilized a division of eight team members and charted safety paths during Operation Enduring Freedom.
- Led teams in 14 missions, ensuring the safe transfer of 1.7K pallets and 10M gallons of fuel, while processing over 2,000 pallets of reusable parts for recycling through the Defense Reutilization Marketing Office.

TRAINING

Microsoft Software Systems Academy

Cloud Application Development Student

July 2022 – November 2022

- Completed 650+ hours in the 17-week Microsoft Software & Systems Academy (MSSA), focused on software development fundamentals and cloud technologies.
- Built full-stack applications using C#, ASP.NET, SQL, HTML5, CSS3, JavaScript, and Git/GitHub; gained hands-on experience with Azure cloud services.

ACI Learning

Computer User Support Specialist Student

August 2021 – November 2021

- Installed, managed, and supported systems and corporate networks; performed troubleshooting.
- Identified threats, hardened systems, secured communications, and enforced security protocols.

CERTIFICATIONS
